Dear Colleagues,

It is a pleasure to invite you to the 7th EPOS BAT Instructional Course Trilogy, an integral part of the EPOS BAT Educational Programme. The EPOS Educational Committee has set up the “BAT (Basic, Advanced & Traumatology) Educational Programme”. The programme meets the requirements set by the European Federation of National Associations of Orthopaedics and Traumatology (EFORT) and European Board of Orthopaedics and Traumatology (EBOT). Three consecutive courses including two basics and one trauma cover the core curriculum education in Children’s Orthopaedics. 23 courses were held between 2011 and 2023 and the one that will be held between 15 and 17 November 2023 will be the last course of the seventh trilogy.

Educational Programme in Childrens Orthopaedics

The course is aimed at residents, fellows and young attending surgeons who want to improve their knowledge in Children’s Orthopaedics and also general Orthopaedic Surgeons who want to refresh their knowledge. The scientific content should encourage a greater understanding of Children’s Orthopaedics via a problem-solving approach to the diagnosis and management of orthopaedic conditions

in children informed by relevant research evidence. Teaching Faculties are composed of internationally recognized experts in Children’s Orthopaedics from all over Europe.

The third part of the BAT course trilogy is the Paediatric Orthopaedics Basic II Course and includes theoretical lectures, debates, techniques in paediatric orthopaedics, case discussions and workshops concerning neuromuscular, spine, upper limb and knee disorders as well as bone tumors and musculoskeletal infections in children.

Treatment innovations are often as a result of collaboration between clinicians and industry and our industry partners contribute significantly to the educational content of these courses.

We invite you to the Orthopaedic Hospital Speising in Vienna in November 2023. We will do our utmost to meet and exceed your expectations.

Yours,

Catharina Chiari
